

Introducing MuniConnect™ by Orange Lien Data

The proprietary web portal solution offered by Orange Lien Data is the only technology platform that has the capability of aggregating all of your pertinent information related to codes, permits, and utilities. No matter the format, your organization will have the ability to virtually access and export written, spreadsheet, and AS400 data.

Specifically designed to serve government agencies that have limited personnel and financial resources, Orange Lien Data's MuniConnect™ platform seamlessly integrates departments tasked with conducting municipal lien searches and easily indexes this information by name, address, tax ID number, and parcel ID number. Moreover, when you opt to use this web portal service, Orange Lien Data will integrate and upload all of your information into our system at no cost to you.

How It Works

Through a personalized on-site visit, our team will partner with each of your departments in an effort to learn about how they work. Orange Lien Data guarantees the following:

- We will document processes and procedures, learn about your organization, and engage with you to understand routine questions that your clients ask.
- We will collaborate with your Information Technology department to initiate the integration of your platform(s) with ours.
- No matter the format—written, spreadsheet, AS400, or other popular code/permit/utility platforms—our team will diligently ensure that all of your code, permit, and utility data finds a home in our system—even if manual input is required.
- We will translate your system into our product platform while ensuring that the information is sampled extensively and audited throughout migration for consistency, quality, and integrity.
- If needed, we have the capability of being able to customize software to accommodate local data requirements, and our customer service and technical teams will be on stand-by to ensure the entire process runs smoothly.

Easy Information Retrieval

One of the perks offered by Orange Lien Data's MuniConnect™ is the Direct Access Information Retrieval option, which provides lien search companies with easy and direct information access through our web portal. With a user friendly registration and login process, lien search company representatives can retrieve requested information easily and efficiently. Then, through technology-driven processes, fees are collected upon information delivery. At the end of the month, a reconciliation is performed and your department will be provided a detailed account of the reports that were pulled as well as collected fees and funds due to you. What's more is that you will be able to access all of this information in a real-time environment—simply by logging in.
